## PROJECT

**Job Search Portal**  
Team Project, Parul University  
Collaboratively developed a job search platform using the MERN stack (MongoDB, Express, React, Node.js). The portal allows users to search and apply for jobs, while employers can post listings and manage applications. The project features user authentication, real-time search filters, and a user-friendly interface to enhance the job-seeking experience.

**VoiceMark : A Voice Recognition-Based Attendance System**  
Team Project, Parul University  
Developed a system that leverages voice recognition technology to automate the attendance process. The system captures voice commands, processes them, and records student attendance, significantly reducing manual effort and improving accuracy. Key technologies used include speech recognition, web automation with Selenium, and data logging in Excel.
