SUMMARY

I am Dimple Parmar. Dedicated and self-motivated Computer Science student with a foundation in programming and web development. Proficient in Python, Java, HTML/CSS, etc. with hands-on experience through academic projects. Eager to gain practical experience through an internship to apply technical knowledge and contribute to innovative solutions. I am willingness to learn, and a passion for technology make me a valuable addition to any team."

PROJECTS

▪ Job Search Portal

Team Project, Parul University

Collaboratively developed a job search platform using the MERN stack. The portal allows users to search and apply for jobs, while employers can post listings and manage application. The project features user authentication, real-time search filters, and a user-friendly interface to enhance the job-seeking experience.

▪ VoiceMark: A voice Recognition- Based Attendance System

Team Project, Parul University

Developed a system that leverages voice recognition technology to automate the attendance process. The system capture voice command, processes them, and records student attendance, significantly reducing manual effort and improving accuracy. Key technologies used include speech recognition, web automation with Selenium, and data logging in Excel.

EDUCATION

2019-2021
S.S.V SCHOOL

Vadodara, Gujarat

2021-2025
PARUL UNIVERSITY

- B.tech(Computer Science and Engineering)

SKILLS

- Python
- Html
- Css
- Javascript
- React
- Sql
- Mongodb

LANGUAGES

- English
